

GENEROUS CONTRIBUTORS offer COMMUNITY SUPPORT
by Cindy Smith

Fremont County residents are fortunate to have strong community support for local projects, and the Crossroads Through Time project is no exception. Community and regional contributions of cash and material, as well as discounts, have been vital for the success of the Geology Time Trail at Pueblo Community College - Fremont Campus.

The Crossroads Through Time Steering Committee acknowledges and thanks each of the following companies, organizations and individuals who have generously contributed so that the Crossroads Through Time - Geology Time Trail and People and Places Trail can become a viable community resource.
